

Strategies for supporting pupils with Special Educational Needs and Disabilities in Design Technology lessons.

Individual Need	Here's how we help everyone shine
Attention Deficit Hyperactivity Disorder	 ✓ Praise positive behaviour at each step to encourage low self-esteem. ✓ Ensure clear instructions are given throughout the lesson. ✓ Provide time limited learning breaks. ✓ Ensure step by step instructions are given, so each child knows what part of the lesson they are working on. (For example, the design, the creation or the evaluation) ✓ Provide additional time for pupils to express their ideas
	 before the lesson with a pre-teach where appropriate. ✓ Provide D&T tools when necessary to avoid distractions during teacher input.
Anxiety	 ✓ Ensure the child knows the support available on offer before the lesson begins. ✓ Provide lots of opportunities to ask questions to clarify thinking and ideas during the lesson. ✓ Teach problem solving before the lesson, and strategies to overcome problems that might be faced in these subjects. ✓ Model how to use D&T tools before setting the work. ✓ Use a 'Now and Next' board to explain any changes to the routine, for example if a child will be sitting somewhere else to complete group work, manage this before it happens.
Autism Spectrum Disorder	 ✓ Use a visual timetable so the child knows what is happening at each stage of the day. ✓ Understand if your child is hypo-sensitive or hypersensitive and how they will manage the sensory work you are asking them to partake in. ✓ Provide materials and textures that they can use and understand this information before the lesson. ✓ Avoid changing seating plans ✓ Ensure outcomes are clear, with a clear end point to the lesson, so children know when they have reached this. ✓ Use simple, specific instructions that are clear to understand. ✓ Understand your student's skills, and where their starting place is.
Dyscalculia	 ✓ Provide concrete resources to help with mathematical equations, drawing to scale and planning D&T projects. ✓ Make a resource box for different D&T project stages. ✓ Use technology available during the design process if required.

	 Ensure the child knows the support available on offer before the lesson begins.
	✓ Provide electric measuring tools for cooking to aid
	independence.
Dyslexia	✓ Use simple, specific instructions that are clear to
	understand.
	✓ Pre-teach vocabulary linked to D&T that will help the
	child to succeed in the lesson like planning, designing and evaluating.
	✓ Differentiate the Learning Intention so the child
	understands what is being asked of them.
	✓ Model how to use D&T tools before setting the work.
Dyspraxia	✓ Make the most of large spaces before starting projects.
	✓ Provide looped scissors if needed.
	 Ensure the tools you are using are accessible to the child i.e rulers with handles.
	✓ Provide a lesson breakdown, with a clear end, a tick list
	might be beneficial.
	✓ Provide an equipment list, words, or visuals, with the tools
	and materials needed during the lesson.
	✓ Model how to use D&T tools before setting the work.
	 Differentiate the size and scale of a project and its end result.
Hearing Impairment	 ✓ Make sure instructions are clear and concise, in case the
	child lip reads, and in case of an emergency.
	✓ Give instructions when the room is quieter, and be
	mindful of additional noise when cooking, or using loud tools like hammers.
	✓ Pre-teach vocabulary linked to D&T that will help the
	child to succeed in the lesson like planning, designing
	and evaluating.
	 ✓ Try and arrange tables in a circular shape. ✓ Provide sign language visuals where possible.
Toileting Issues	✓ Frovide sign language visuals where possible. ✓ Encourage children to use the toilet before working on a
	project, as they may feel this isn't as easy when they are
	wearing protective clothes and covered in
	clay/glue/cooking ingredients etc.
	✓ Encourage children to wear protective clothes that
	make access to the bathroom manageable. ✓ Use visuals to break each stage of the design process
	down into clear, manageable tasks.
Cognition and Learning Challenges	✓ Use language that is understood by the child, or take the
	time to pre-teach language concepts including design,
	develop and evaluate.
	✓ Provide resource lists with visuals so children know what
	resources they need for an activity and can begin to access these independently.
	✓ Model how to use D&T tools before setting the work.
	✓ Physically demonstrate the lesson and the expectations
	include designing, making and evaluating where
	possible.

	 ✓ Support children with their organisation in the lesson, especially when cooking to make sure they do not default from the final product. ✓ When cooking, or making something provide checklists which can be ticked off.
Speech, Language & Communication Needs	 ✓ Provide instruction that are clear, concise and match the language of the child, delivering these instructions slowly. ✓ Use a visual timetable where necessary. ✓ Use visuals on resource lists. ✓ Use visuals on resource boxes so children know which one to access. ✓ Encourage designs and evaluations to be done using pictures and child's voice where possible and then
Tourette Syndrome	recorded by an adult. ✓ Provide short, simple clear instructions. ✓ Try and keep the children calm in a lesson, although D&T can be exciting, as this can lead to a tic. ✓ Provide additional support with cutting, using looped scissors and handled rulers.
Experienced Trauma	 ✓ Provide opportunities to be curious and explore the tools and resources that children will use. ✓ Use simple, specific instructions that are clear to understand, and deliver these slowly. ✓ Slowly build up the tools a child can use, as they become more confident in their work, especially in regard to cooking ✓ Model and remind children behavioural expectations when using tools including clay and cooking, and safe ways of using these including health and hygiene. Use visuals if needed. ✓ Before the lesson, come up with strategies for if difficulties occur during the lesson, and ways these can be overcome, reminding children that D&T is about trial and error.
Visual Impairment	 ✓ Make sure you have the child's attention before giving instructions. ✓ Encourage children to verbalise their design and evaluation as well as their thoughts and feelings if possible ✓ Make sure resources are well organised and not cluttered. ✓ When drawing designs or writing evaluations, provide thicker, dark pencils to write with. ✓ Provide enlarged examples of the work to be completed. ✓ Provide children with additional time when exploring new textures and materials.
